

**AMENDMENTS TO THE CLAIMS**

**Please amend claims 1, 8, 9, 11-20, 26, 27 and 29-36.**

1. (currently amended) A system for improved modeling of a biological system that comprises a plurality of chemical reactions, the system comprising:

a modeling component comprising a graphical user interface for accepting user commands and input to construct a model of the biological system, the model being represented in a tabular view and a graphical view, the tabular view being adapted to receive the user commands and input to construct the model;

a simulation engine accepting as input the constructed model of the biological system and generating as output dynamic behavior of the biological system; and

an analysis environment in communication with the simulation engine, the analysis environment displaying dynamic behavior of the biological system.

2. (Original) The system of claim 1 wherein the modeling component allows construction of a block diagram model of the biological system.

3. (Original) The system of claim 2 wherein the modeling component further includes at least one block identifying a set of related chemical reactions.

4. (Original) The system of claim 1 wherein the modeling component includes a tool palette for aiding construction of the model of the biological system.

5. (previously presented) The system of claim 1 wherein the simulation engine generates the dynamic behavior of the biological system using a stochastic computational model.

6. (withdrawn) The system of claim 1 wherein said simulation engine generates the dynamic behavior of the biological system using a discrete time-based computational model.

7. (withdrawn) The system of claim 1 wherein said simulation engine generates the dynamic behavior of the biological system using a continuous time-based computational model.

8. (currently amended) A computer-implemented improved method for modeling a biological process comprising a plurality of chemical reactions, the method comprising ~~the steps of:~~

- ~~(a)~~ providing a graphical user interface;
- ~~(b)~~ receiving, via the provided user interface, user commands and data;
- ~~(c)~~ constructing, using the received user commands and data, a model of the biological process, the model being represented in a tabular view and a graphical view, the tabular view being adapted to receive the user commands and input to construct the model;
- ~~(d)~~ generating, using the constructed model of the biological process, dynamic behavior of the modeled biological process; and
- ~~(e)~~ displaying the dynamic behavior of the biological process on a display device.

9. (currently amended) The method of claim 8 wherein ~~step (c) constructing further comprises:~~ constructing a block diagram model of the biological process.

10. (Original) The method of claim 9 wherein the block diagram model includes at least one block identifying a set of related chemical reactions.

11. (currently amended) The method of claim 8 wherein ~~step (d) generating further comprises:~~ generating, using the constructed model of the biological process, dynamic behavior of the modeled biological process using a stochastic computational model.

12. (withdrawn) The method of claim 8 wherein ~~step (d) generating further comprises:~~ generating, using the constructed model of the biological process, dynamic behavior of the modeled biological process using a discrete time-based computational model.

13. (withdrawn) The method of claim 8 wherein ~~step (d) generating further comprises:~~ generating, using the constructed model of the biological process, dynamic behavior of the modeled biological process using a continuous time-based computational model.

14. (currently amended) An article of manufacture having embodied thereon computer-readable ~~program means~~instructions for improved modeling of a biological process comprising a plurality of chemical reactions, the article of manufacture comprising:

computer-readable ~~program means instructions~~ for providing a graphical user interface;  
computer-readable ~~program means instructions~~ for receiving, via the provided user interface, user commands and data;

computer-readable ~~program means instructions~~ for constructing, using the received user commands and data, a model of the biological process, the model being represented in a tabular view and a graphical view, the tabular view being adapted to receive the user commands and input to construct the model;

computer-readable ~~program means instructions~~ for generating, using the constructed model of the biological process, dynamic behavior of the modeled biological process; and

computer-readable ~~program means instructions~~ for displaying the dynamic behavior of the biological process.

15. (currently amended) The article of manufacture of claim 14 wherein the computer-readable ~~program means instructions~~ for constructing a model of the biological process comprises computer-readable ~~program means instructions~~ for constructing a block diagram model of a biological process.

16. (currently amended) The article of manufacture of claim 15 wherein the computer-readable ~~program means instructions~~ for constructing a block diagram model of the biological process includes computer-readable ~~program means instructions~~ for constructing at least one block identifying a set of related chemical reactions.

17. (currently amended) The article of manufacture of claim 14 wherein the computer-readable ~~program means instructions~~ for generating dynamic behavior of the modeled biological process comprises computer-readable ~~program means instructions~~ for generating dynamic behavior of the modeled biological process using a stochastic computational model.

18. (withdrawn) The article of manufacture of claim 14 wherein computer-readable ~~program means instructions~~ for generating dynamic behavior of the modeled biological process comprises computer-readable ~~program means instructions~~ for generating dynamic behavior of the modeled biological process using an event-based computational model.

19. (withdrawn) The article of manufacture of claim 14 wherein computer-readable ~~program means instructions~~ for generating dynamic behavior of the modeled biological process comprises computer-readable ~~program means instructions~~ for generating dynamic behavior of the modeled biological process using a continuous time-based computational model.

20. (currently amended) A system for improved modeling of a chemical reaction comprising:  
a modeling environment accepting user commands and input for constructing a model of a chemical reaction, the model being represented in a tabular view and a graphical view, the tabular view being adapted to receive the user commands and input to construct the model;  
a simulation engine accepting as input the constructed model of the chemical reaction and generating as output an expected result; and  
an analysis environment in communication with the simulation engine, the analysis environment displaying the expected result.

21. (Original) The system of claim 20 wherein the modeling environment allows construction of a block diagram model of a chemical reaction.

22. (Original) The system of claim 21 wherein the modeling environment further includes at least one block identifying a set of related chemical reactions.

23. (previously presented) The system of claim 20 wherein the simulation engine generates an expected result using a stochastic computational model.

24. (withdrawn) The system of claim 20 wherein said simulation engine generates an expected result using a discrete time-based computational model.

25. (withdrawn) The system of claim 20 wherein said simulation engine generates an expected result using a continuous time-based computational model.

26. (currently amended) A computer-implemented method for integrated modeling, simulation and analysis of chemical reactions, the method comprising ~~the steps of:~~

(a) providing a graphical user interface for accepting user commands and data;

- ~~(b)~~ receiving, via the provided user interface, user commands and data;
- ~~(e)~~ constructing, using the received user commands and data, a model of a chemical reaction, the model being represented in a tabular view and a graphical view, the tabular view being adapted to receive the user commands and input to construct the model;
- ~~(d)~~ generating, using the constructed model of the chemical reaction, an expected result of the modeled chemical reaction; and
- ~~(e)~~ displaying the expected result.

27. (currently amended) The method of claim 26 wherein ~~step (e) constructing further~~ comprises:

constructing a block diagram model of a chemical reaction.

28. (Original) The method of claim 27 wherein the block diagram model includes at least one block identifying a set of related chemical reactions.

29. (currently amended) The method of claim 26 wherein ~~step (d) generating further~~ comprises:  
generating, using the constructed model of the chemical reaction, an expected result of the modeled chemical reaction using a stochastic computational model.

30. (withdrawn) The method of claim 26 wherein ~~step (d) generating further~~ comprises:  
generating, using the constructed model of the chemical reaction, an expected result of the modeled chemical reaction using a discrete time-based computational model.

31. (withdrawn) The method of claim 26 wherein ~~step (d) generating further~~ comprises:  
generating, using the constructed model of the chemical reaction, an expected result of the modeled chemical reaction using a continuous time-based computational model.

32. (currently amended) An article of manufacture having embodied thereon computer-readable ~~program means instructions~~ for integrated modeling, simulation and analysis of chemical reactions, the article of manufacture comprising:

computer-readable ~~program means instructions~~ for providing a graphical user interface for accepting user commands and data;

computer-readable ~~program means instructions~~ for receiving, via the provided user interface, user commands and data;

computer-readable ~~program means instructions~~ for constructing, using the received user commands and data, a model of a chemical reaction, the model being represented in a tabular view and a graphical view, ~~the tabular view being adapted to receive the user commands and input to construct the model;~~

computer-readable ~~program means instructions~~ for generating, using the constructed model of the chemical reaction, an expected result of the modeled chemical reaction; and

computer-readable ~~program means instructions~~ for displaying the expected result.

33. (currently amended) The article of manufacture of claim 32 wherein the computer-readable ~~program means instructions~~ for constructing a model of the chemical reaction comprises computer-readable ~~program means instructions~~ for constructing a block diagram model of a chemical reaction.

34. (currently amended) The article of manufacture of claim 33 wherein the computer-readable ~~program means instructions~~ for constructing a block diagram model of the chemical reaction includes computer-readable ~~program means instructions~~ for constructing at least one block identifying a set of related chemical reactions.

35. (currently amended) The article of manufacture of claim 32 wherein computer-readable ~~program means instructions~~ for generating an expected result of the modeled chemical reaction comprises computer-readable ~~program means instructions~~ for generating an expected result of the modeled chemical reaction using a stochastic computational model.

36. (withdrawn) The article of manufacture of claim 32 wherein computer-readable ~~program means instructions~~ for generating an expected result of the modeled chemical reaction comprises computer-readable ~~program means instructions~~ for generating an expected result of the modeled chemical reaction using an event-based computational model.

37. (previously presented) The system of claim 1 wherein the tabular view and the graphical view of the model comprise annotations to the model that are provided by a user.

38. (previously presented) The method of claim 8 wherein the tabular view and the graphical view of the model comprise annotations to the model that are provided by a user.

39. (previously presented) The article of manufacture of claim 14 wherein the tabular view and the graphical view of the model comprise annotations to the model that are provided by a user.
